

Zubair Khalid

Senior Software Engineer — Mobile

Lahore, Pakistan · +92-312-4579459 · zabi.butt1989@gmail.com · linkedin.com/in/zubair-khalid-20bb769a

SUMMARY

Senior Software Engineer specializing in mobile application development. I lead delivery of production apps with a practical mix of native Android, cross-platform (React Native, Ionic, Flutter), and full-stack work. Comfortable owning the lifecycle: implementation, UI integration, release, and ongoing optimization.

SELECTED APPS

Essential Emotions — Emotional health, on the phone

A mobile app focused on emotional health — helping people look up emotions and stay engaged with the product's guidance tools. Mobile engineer at 3S Solutions. Mobile, Android.

EXPERIENCE

Senior Software Engineer - Mobile · 3S Solutions (Pvt) Ltd

04/2023 – Present

- Lead crafting and shipping of production mobile applications across native Android, React Native, and Ionic.
- Own the full app lifecycle: implementation, UI/UX integration, release, and ongoing performance work.
- Keep delivery aligned with current platform capabilities rather than one-off feature dumps.

Android App Developer · 3S Solutions (Pvt) Ltd

02/2021 – 04/2023

- Developed Android applications with a focus on usability and optimization.
- Collaborated on team projects and code reviews.
- Applied standard mobile development practices across features and releases.

Full Stack Engineer · Graffitecs Solutions

08/2020 – 02/2021

- Contributed to both front-end and back-end development.
- Worked across the stack to deliver complete software features for client projects.

Mobile Application & .NET Backend Developer · CoinBitSolution (Pvt) Ltd

08/2018 – 07/2020

- Developed Android application features and .NET MVC backend services.
- Worked on mobile functionality alongside server-side APIs for product flows.

Junior Software Developer · Inovedia Technologies Ltd

06/2018 – 08/2018

- Gained practical experience in Android app development.
- Assisted in ERC-20 Ethereum token development.

SKILLS

Android: Android Studio, Kotlin, Java, BLE

Cross-platform: React Native, Flutter, Ionic, React, TypeScript, Dart

Backend: .NET, C#, Microsoft SQL Server, Visual Studio

Tools: IntelliJ, Git
